

I am a listener and supporter of K-LOVE, a national service heard on FM translators in my area on 91.1, 88.3 and 88.5. K-LOVE provides a unique service to my community by offering encouraging and uplifting music that is appropriate for family listening. I have heard of young people who have started listening to K-LOVE solely because of the positive message communicated. The expansion of LPFM stations would displace the unique content K-LOVE provides. I oppose the proposed rule change which would allow LPFM translators to take priority over current FM translator services.
